Short slate: 1 game today. Picks are one per team, so there are 2 home run picks instead of six, and the 5-pick parlays need five different games, so none is posted.

HIT PICKS WITH AT LEAST ONE HIT

Scored against the day's box scores, refreshed each time the page loads (as of 2026-10-02 18:34:09). A pick counts as decided only once its game is final.

Projected Hits

Expected hits from the hitter's rate and his contact quality, the starter's hits allowed and strikeout rate, the bullpen, the park, and his plate appearances for his lineup slot, each weighted by what the 2026 season replay showed it is worth. The rows below show the matchup pieces.

Batter vs Pitcher History

Hitters with a notable line against today's opposing starter.

Hitter	Starter	Line	Rate	Season rate	HR	K
Drake Baldwin Atlanta Braves	Aaron Nola	4-for-9	0.444	0.253	0	1
Ronald Acuña Jr. Atlanta Braves	Aaron Nola	4-for-9	0.444	0.218	0	0
Mauricio Dubón Atlanta Braves	Aaron Nola	3-for-9	0.333	0.256	0	0

Matt Olson Atlanta Braves	Aaron Nola	2-for-9	0.222	0.223	2	2
Michael Harris II Atlanta Braves	Aaron Nola	0-for-9	0.000	0.283	0	3
Ozzie Albies Atlanta Braves	Aaron Nola	0-for-9	0.000	0.214	0	1

Context only — this feeds none of the projections above. The largest batter-vs-pitcher sample all season is 13 plate appearances, and only about 520 pairs reach even 8. At that size the standard error on a hit rate is roughly .16, wider than the entire spread of true talent between major-league hitters. A 4-for-9 line is noise that looks like a trend, so it is shown with its sample size attached and deliberately kept out of the model.

Read AUC first. The slate ranks hitters and takes the top six, so ordering is what matters; AUC asks whether home runs were ranked above non-home-runs. Per-PA Brier and log loss are dominated by the ~3% base rate and barely separate the models. Metrics are per plate appearance, while the probabilities above are per game.
