HIT PICKS WITH AT LEAST ONE HIT

Scored against the day's box scores, refreshed each time the page loads (as of 2026-10-05 21:24:37). A pick counts as decided only once its game is final.

Projected Hits

Expected hits from the hitter's rate and his contact quality, the starter's hits allowed and strikeout rate, the bullpen, the park, and his plate appearances for his lineup slot, each weighted by what the 2026 season replay showed it is worth. The rows below show the matchup pieces.

X **MISS**projected 1.10 hits → 0-2 | 2 BB

Brier: 0.02943

Log Loss: 0.13445

Cal. RMSE: 0.00482

Read AUC first. The slate ranks hitters and takes the top six, so ordering is what matters; AUC asks whether home runs were ranked above non-home-runs. Per-PA Brier and log loss are dominated by the ~3% base rate and barely separate the models. Metrics are per plate appearance, while the probabilities above are per game.
