HIT PICKS WITH AT LEAST ONE HIT

Scored against the day's box scores, refreshed each time the page loads (as of 2026-09-21 21:49:47). A pick counts as decided only once its game is final.

Projected Hits

Same odds-ratio matchup as the strikeout model, applied to contact: the hitter's rate and the pitcher's hits-allowed rate combined relative to league, then split across starter and bullpen exposure.

X **MISS**projected 1.12 hits → 0-4 | 2 K

1

Jackson Chourio

Milwaukee Brewers

1.12 hits

AUC: **0.5906**

Top-decile lift: 1.51×

Brier: 0.02878

Log Loss: 0.13248

Cal. RMSE: 0.00428

Read AUC first. The slate ranks hitters and takes the top six, so ordering is what matters; AUC asks whether home runs were ranked above non-home-runs. Per-PA Brier and log loss are dominated by the ~3% base rate and barely separate the models. Metrics are per plate appearance, while the probabilities above are per game.
